Only Forest offers complete color integration of dental equipment with your interior design. Choose from nine powder coat paint colors, three carbon fiber trim choices as well as a chrome option. Create a personalized look that will make you, your staff and patients smile.
Affordable Excellence

Big brand features for less is the brand strategy that has helped us become an industry growth leader. We pay extra attention to detail and quality, from tight tolerances between parts to durable finishes and metal components, instead of plastic, for maximum value.
PAINT BY NUMBERS, A DESIGNER’S DREAM.

CHOICES
CONTRAST
“The ergonomics of the rear-mount side-delivery system are especially important because improper sitting and reaching is what shortens our careers. With this system, you’re sitting in the proper position at 11 o’clock, bent from the hip, and you don’t have to take your eyes away from the patient or reach. Everything is where it needs to be at all times.”

Brad Boeke, DDS
Bayside Dental, TX
THE 7000 SERIES

ANY WAY YOU SPIN IT, IT’S ALL ABOUT REAR-MOUNT SIDE DELIVERY.

Upholstery: Standard Plush: Riviera Ultraleather®

7020 PRO
Powder Coat Paint Color: Shadow
Solid Surface: Baja Melange
7020 PRO Cart Powder Coat Paint Color: Midnight and Copper - Solid Surface: Antarctica
We are very proud to introduce you to our 7000 Series side-delivery systems. Compare them with any delivery system—at any price—from any North American manufacturer. You’ll easily discover why the 7000 Series offers you the highest quality product available today.
WE KEEP IT TIGHT

7020 PRO Cart Powder Coat Paint Color: Copper - Solid Surface: Goldrush Gemstone
EVERY DETAIL DONE RIGHT.
The under cabinet mount will free up space for a drawer or nitrous mount by moving the mount underneath the cabinet. Designed to be compatible with all big-brand rear cabinets, the 7000 Series under cabinet mount is an excellent alternative to their delivery systems.
Beneath Counter Mount

The very popular beneath counter mount is anchored by a half-inch steel plate that can be integrated into your custom-made rear cabinet, or as part of a Modular & Custom Cabinetry rear cabinet (PFR8144), which includes the steel plate pre-installed.

Wall Mount

The wall mount is often used with an upper cabinet module for the storage of tubs and cassettes. The 7000 Series can replace the lower cabinet because it contains the industry’s largest storage space “under the hood” for ancillaries that would otherwise be installed in cabinetry. The money saved by eliminating the lower cabinet goes a long way toward purchasing other practice-enhancing items and is an excellent solution for shorter treatment rooms.
The 3900 Chair

Our 3900 patient chair is widely recognized as the only mid-priced chair on the market with many of the same features as the most expensive chairs. The 3900 offers molded rather than vacuum-formed plastic for longevity and better fit; we use steel and aluminum instead of plastic wherever possible for reliability and durability; and higher quality paints and upholstery will look as sharp as they did on installation day for years to come.

Our 3900 patient chair offers more upgrades and options to choose from than any of our competitors, including nine powder coat paint finishes, 17 upholstery colors, three upholstery options (seamless, stitched plush and memory comfort), contrast color stitching and even dual color upholstery that shows like an expensive sports car. Additional options include a narrow back with slings, neck and knee pillow, pedo-wedge and self-contained back massager.

Built to your exact specifications, the 3900 patient chair is simply the best value on the market today.
3900 Patient Chair
Powder Coat Paint Color: Charcoal
Upholstery Standard Plush: Raven Wing Ultradeather® w/ Red Contrast Deviated Stitching
If you need more space when working around the patient, the 3900 Narrow Back—with or without slings—is the smart choice. The optional slings lend a feeling of extra support to patients of any size, especially children. They also provide a contact barrier between you and your patient to help them feel relaxed and at ease. The 3900 slings are enhanced with a unique stiffening web at the elbow to prevent collapsing.

The Memory Comfort upholstery option is an exceptional selection for long procedures or for those who are especially concerned with the patient experience. Simply stated, this upgrade makes it the most comfortable patient chair available today. With an unprecedented three inches of Aerus memory foam layered atop a five-inch base of high density foam, Forest's Memory Comfort offers support where it's needed most, particularly the lumbar area. Patients will enjoy pillow-like comfort comparable to luxury memory foam mattresses. Transform their experience to that of spa-like indulgence with optional neck and knee pillow.

The 3900 Standard upholstery is designed with features ideal for any practice. Wide at the elbow and tapering in directly at the shoulder, the chair’s backrest allows for close access to the patient while accommodating people of all sizes. Patients will enjoy the comfort of ample lumbar support, high-quality foam and standard glove-soft Ultraleather® upholstery.

Upholstery Dual Standard Plush With Slings: Doe and Pearl Pewter Ultraleather®
HYGGE is a Danish word that defines a quality of cosiness and comfortable conviviality. It engenders a feeling of contentment or well-being. Forest Dental recognizes that all treatment rooms need to GET HYGGE—for both doctor and patient! When a patient is reclining in the operatory chair, neck and knee support has been a necessity for years and now there is no need to roll towels. Forest Dental has designed a set of pillows that will not only make your patient rest at ease but will be easy on the eyes.

Dual Color Standard Plush: Pearl Albalone and Copper Ultraleather® w/ Copper Contrast Deviated Stitching
Equipped with an ultra reliable pneumatic control block, the Standard IC is acclaimed for its simple design and straightforward technology. We use one Clippard anti-retraction valve per handpiece enabling each one to operate independently. If a water drip were to occur in one position due to a stuck valve, two back-ups are available, unlike handpieces from other manufacturers with only one valve for all three positions. Because no water enters the main control block, you won’t experience the damaging effects of water deposits and contamination. Affordable Excellence is achieved when every detail is done well.
The Euro control head pivots at the center of the chassis, allowing it to be positioned both next to and over the patient in the transthoracic position. Designed for maximum reach to the patient, the whips are mounted at the front of the control. The true beauty of Forest’s European-style delivery is how smoothly the whips operate. They pull forward effortlessly and move side to side with just enough resistance to retract back. This control is top-rated in the eyes of the discerning European dentists who have tested it against the vast array of whip system controls available to them.
Finally, a stool you can get excited about. Forest offers North America’s only doctor, assistant and office stools designed for forward-leaning practitioners. The Active-Tilt™ seat plate mechanism allows you to move and lock into a decline, neutral and recline position, eliminating pressure points in any posture. This exclusive feature allows the practitioner to maintain proper alignment for hours of pain-free work.

The backrest allows for natural movement while supporting your spine and releasing tension due to its rounded horizontal plane rather than the industry standard concave; it rolls up and down as you move forward and back, massaging the tissue and increasing circulation in the lumbar area.

Thanks to intelligent engineering you and your staff will enjoy the comfort and back health you deserve.
The 9070 Series LED light brings you all the benefits associated with the latest LED bulbs in an all-aluminum light head housing. Aluminum is superior to plastic as it can be powder coated in one of our nine colors to complement your interior design; the tough finish easily withstands the rigors of the treatment room and will not fade, discolor or crack.
9083 Halogen Light Powder Coat Paint Color: Shadow
Halogen Light

Sales of the 9080 Series halogen light grew 120 percent during the last four years of the recession thanks to Forest’s exclusive concepts of Affordable Excellence and Designer Friendly®. Choose from one of nine lustrous, two-coat powder coat paint colors, accented with chromed billet aluminum arm end caps that won’t crack, fade or fall off. A third axis of rotation allows you to place the light over your shoulder while keeping the long axis of the light pattern parallel with the mouth. The reflector is embedded into the glass preventing it from peeling or cracking over time. An adjustable flex arm on/off actuator, a long-life halogen bulb, a scratch-resistant Lexan light shield and more make this light an outstanding value.
Forest offers five different mounting options for our lights: wall, cabinet, ceiling, track and post. All mounts are heavy-duty in construction and designed with leveling adjustments to eliminate drift. The bearings and bushings in key pivot points are of the highest quality, designed for a long, trouble-free life.

MOUNT IT
Forest Deluxe Cuspidor

The Forest Deluxe Cuspidor is constructed of earthenware ceramic clay and finished with a premium high-gloss glaze. Available in black or white, all of our cuspidors are the most stain and fade resistant on the market today. A cup fill lever moves to either side of the bowl giving you the ability to control its activation with the option to add a unit-mounted activator as well. The Deluxe Cuspidor swings in toward the patient or completely out of the way for convenience. It can be mounted on our pivot left-to-right system or positioned on our chair mounted sidebox to meet your exact needs. The sidebox is then finished with a complementary carbon fiber look cover and painted in one of our nine powder coat paint colors. The cuspidor is equipped with a triple chrome-plated cup fill and bowl rinse spout. You, your staff and patients will enjoy the versatility and good looks of the only Designer Friendly® cuspidor on the market today.

Forest Basic Cuspidor

Our Basic Cuspidor employs simple, easy-to-service and maintain mechanics with a timed bowl rinse and manual cup fill. The ceramic bowl is available in either white or black, which can be easily removed for cleaning. The cover comes in three carbon fiber look finishes or the industry standard Forest Grey and white. The Basic Cuspidor can be unit-mounted with or without a sidebox. Simply stated, it boasts expensive-looks at an affordable price.

Fixed chair mounts offer maximum stability for your unit delivery arm, light post, computer monitor, cuspidor and/or assistant’s arm. A sidebox neatly houses power supplies for ancillary products or an optional Durr amalgam separator. The tubings, cables and water bottles are also hidden from view or cleanly integrated into the housing.

The sidebox can be finished in nine different powder coat paint colors and three carbon fiber choices. When coupled with one of our 17 Ultraleather® upholstery colors, your delivery system complements your decor so well it almost disappears.
If your practice has more than one doctor or hygienist, a pivot left-to-right system may be just what you're looking for. It also makes smart business sense for the solo practitioner who wants the broader appeal of a left- or right-handed treatment room come time to sell. This delivery eliminates the “over-the-patient” arm as it comes from “under-the-chair,” yet positions the delivery head in the same comfortable and familiar position. You will appreciate this less obtrusive solution even if you never use its left-right convertibility. You can also choose a rear pivoting cuspidor or assistant's delivery arm.

Pivot Mount Delivery

If your practice has more than one doctor or hygienist, a pivot left-to-right system may be just what you're looking for. It also makes smart business sense for the solo practitioner who wants the broader appeal of a left- or right-handed treatment room come time to sell. This delivery eliminates the “over-the-patient” arm as it comes from “under-the-chair,” yet positions the delivery head in the same comfortable and familiar position. You will appreciate this less obtrusive solution even if you never use its left-right convertibility. You can also choose a rear pivoting cuspidor or assistant's delivery arm.
