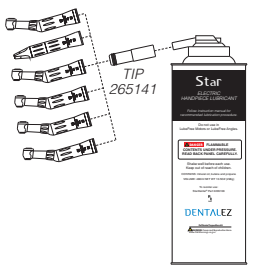
HANDPIECE LUBRICANT FOR ELECTRIC ATTACHMENTS

For maintenance of all electric attachments. For use with all manufacturer's attachments. For proper maintenance consult applicable handpieces' instruction guide(s).

INSTRUCTIONS:

1. Shake well before each use.
2. Thread lubrication tip onto can nozzle.

   Note: Lubricant propellant pressure could eject the attachment from spray nozzle. Cover the unit and spray nozzle with a paper towel after inserting nozzle into attachment.
3. Press handpiece onto lubrication tip until handpiece stops.
4. Place rag around handpiece.
5. Holding firmly, press button on can.
6. Continue pressing button until clean lubricant is expelled from the front of handpiece. If brown/black oil is expelled from the head, repeat this step.
7. Wipe off excess lubricant from handpiece.
8. Stand attachment upright for 2 minutes on a paper towel to drain excess lubricant.
9. Sterilize by placing handpiece into autoclave pouch. Autoclave per instructions for use.



Star
