DENTALEZ

HANDPIECE LOG BOOK

Handpiece Log Book

Maximizing the Return on Your Handpiece Investment

Clinicians rely on consistent and proper working condition of their handpiece or risk unexpected downtime and loss of production.

Reach for the Stars!

It is critical to use genuine Star® turbines in your handpieces, and follow the simple steps outlined in this book.

Knockoff turbines can damage and shorten the lifespan of your handpiece.

To Use This Book:

Read through and then simply fill out the forms contained in the subsequent pages. One handpiece per page, one record per repair, updated as you go throughout the year. Easy! Ask your dealer rep to discuss the practice's handpiece health situation with you periodically throughout the year so there are no surprises.

Handpiece Maintenance

Important Things to Remember

Keep this list in mind each time you clean your handpieces so that they operate at top performance and last longer.

1

Too much pressure?

Remember to follow the manufacturer's instructions regarding air pressure specifications, found in the manual. Higher air pressure does not mean higher performance. Paying attention to the manufacturer's specifications could avoid serious damage to the handpiece, regardless of whether you are working with a high or low-speed device.

2

Keep wipe-downs simple.

Remember to wipe your handpiece down with ONLY isopropyl alcohol, no water or detergents, prior to sterilization. Using strong chemicals to do this is usually unnecessary, and may even cause problems with chemical interactions during sterilization. Do not submerge the handpiece in any liquid, unless the manufacturer's manual explicitly directs you to do so.

3

Keep your lights bright.

Remember to clean any fiber optic surfaces with a cotton swab and alcohol, preventing the buildup of debris that may affect light transmission. Do not use any sharp instruments to clean the fiber optic ends.

4

LubeFree handpieces are ready to use.

Star recommends LubeFree handpieces that do not require lubrication; for lubricated handpieces continue to page 4. LubeFree users continue to page 5.

Is Your Handpiece Lubricated?

If so, follow these steps below

NOTE: Lubricated handpieces only! If you lubricate a LubeFree handpiece once, it will require lubrication going forward.

For maximum turbine life do not exceed recommended pressure.

NOTE: Lubricate handpiece daily with DentaLube II, StarDentalPart #262539, and prior to each sterilization procedure.

1. Disconnect handpiece.
2. Assemble the conical red tip applicator, StarDental Part #202954, into the DentaLube II bottle cap.
3. Find drive air tube at rear of handpiece and place three drops of DentaLube II. Remember to apply enough lubricant to your handpiece, only 3 drops of DentaLube II are needed! Your chuck needs separate care, using Junk-Out Chuck Cleaner (263790) once a week prior to sterilization will help ensure the optimum working condition of the chuck.

NOTE: Never operate handpiece without bur in place

4. With bur in place connect handpiece to tubing, operate for 20 seconds to expel excess lubricant.

Remember to consult your manual.

This list should guide you in escaping some of the common pitfalls associated with handpiece maintenance. First and foremost, however, refer to your manufacturer's manual when determining proper maintenance techniques. Product-specific instructions like these should take precedence over any suggestions you learn from external sources.

**Scan the QR code

handpiece manuals.**

Maintain handpiece performance with genuine Star turbines you can easily replace in-office.

NOTE: Don't send your handpiece out for turbine replacement! Knockoff turbines can damage handpiece and shorten lifespan. Instead, to replace old turbine:

1. Remove old end cap and turbine assembly.
2. Inspect housing before cleaning. Remove any obvious debris to prevent damage and to maintain performance of turbine.
3. Connect handpiece and run air through turbine housing without turbine installed for 5 seconds.
4. Clean housing thoroughly with cotton swab and isopropyl alcohol. Dry with syringe air.
5. Place turbine assembly into housing and gently insert.
6. Position and engage threads of end cap into the housing by hand until snug.
7. Tighten end cap with the combination end cap wrench employing the wrench opening marked AC. Position wrench with marked side facing end cap for best wrench control.
8. Scan QR code below for a video demo and a link to register your turbines. The warranty for a replacement turbine begins on the date of insertion into your handpiece as long as the turbine is registered.

Product codes for turbines

Red, smaller
for use in 430

	1 Pack	4 Pack	
Lubricated	263968	263453	2yr Warranty
LubeFree	263739	264184	1yr Warranty

Black, high performance
for use in 430 Torque, Star 500 Elite or Star 400 Flex

	1 Pack	4 Pack	
Lubricated	265885	265895	2yr Warranty
LubeFree	265877	265894	1yr Warranty

Each turbine comes with the turbine, end cap, and removal tool.

NOTE: Remember to register your turbine warranty!

Turbine Checklist.**

Genuine Star DENTALEZ Parts

Handpiece Repair Decisions

When you purchase a new handpiece, it comes from the factory in peak condition. Over time, through repeated use and multiple sterilizations, parts and components wear down. You might begin to notice it doesn't cut as well, or the chuck no longer holds a bur. These are all signs that your handpiece needs a repair.

Send handpieces for repair to Star or a Star authorized repair center using genuine Star parts; failure to do so will void the warranty and can in some cases cause injury. Plus when you choose Star parts, your handpiece is returned to near new condition. Made in the USA, Star handpieces are repaired with meticulous care to exact specifications.

Service & Repair Requests

1. Obtain a pre-paid shipping label via our repair form at dentalez.com/star-repair or simply contact us via your preferred method and our Customer Experience team we will be happy to assist you.
2. We are committed to 100% transparency. No costs will be incurred until you approve a quote from us; and if we cannot service or repair your handpiece, we will help you quickly find a suitable solution for your needs.
